

# CORONAVIRUS DISEASE 2019 (COVID-19)

## WHAT IS IT?

- A new respiratory virus first identified in Wuhan, China
- It has the potential to cause severe illness and pneumonia in some people

## HOW IS IT SPREAD?

- Through the air by coughing and sneezing
- Close personal contact, such as touching or shaking hands
- Touching an object or surface with the virus on it, then touching your mouth, nose, or eyes

## WHO IS AT RISK?

- People over 60
- Those who are immunocompromised
- People with disabilities
- Those who are undocumented immigrants
- People who have chronic health conditions
- Those suffering from behavioral health issues
- Those who are experiencing homelessness

**ALL FACE GREATER RISKS FOR COVID-19**

## WHAT ARE THE SYMPTOMS?

Illnesses can be mild, or in some cases be severe enough to require hospitalization. Symptoms of this respiratory illness primarily include:

- Fever
- Cough
- Aches
- Sore Throat
- Shortness of breath

## HOW IS IT PREVENTED AND TREATED?

- Similar to prevention of other respiratory illnesses, including the flu:
  - Wash hands often
  - Avoid touching eyes, nose, or mouth with unwashed hands
  - Avoid contact with sick people
  - Stay home while you are sick; avoid others
  - Cover mouth/nose with a tissue or sleeve when coughing or sneezing
- Most people with mild coronavirus illness will recover on their own by drinking plenty of fluids, resting, and taking pain and fever medications.
