PPE General Style Catalog

Typical Suppliers of use:

- *Medline*
- *Cardinal*
- *McKesson*
- *Boundtree Medical*

Additional Notes and examples: Face Masks

- Below is an example of face masks, these can be procedural or surgical, but should be fluid resistant. This would be for the patient to wear to decrease the risk of disease spread.
- ANY COLOR in either style mask is acceptable

Example 1.1

Fluid-Resistant Procedure Face Masks

- Fluid-Resistant Procedure Masks offer full protection against fluids at either the ASTM F1862 160 mmHg or 120 mmHg Fluid Resistance Levels.
- Cellulose inner facing creates a soft, cool and non-irritating environment for comfort.
- An anti-fog strip of comfortable, soft foam prevents eyeglasses from fogging, thus ensuring optical clarity while earloops make for easy donning and removal.
- BFE > 99%, PFE > 99%, ASTM F1862 160 mmHg / 120 mmHg Fluid Resistance.

Additional Notes and examples: Eye Protection

- Face Shields are considered the most cost effective eye protection
- Face Shields should be fluid resistant and can be either procedural (elastic loops to go around ears) or surgical style mask (ties behind head) with eye protection attached this would be for providers to wear

Example 3.1

Catalog > OR/Surgery > Protective Wear > Face Masks >

Disposable Full Face Shields by Splash Shield

- These anti-fog face shields are optically clear to maintain visibility in the O.R.
- Lightweight, comfortable design with Soft Strap securement
- Impenetrable foam barrier for wide coverage
- Disposable and cost efficient
